

TSL 2021 INTERNATIONAL SCHOOLS' SUMMIT

PARTNER POWER: PROTECTING BIODIVERSITY

How can we improve collaboration to protect biodiversity and reverse the sixth mass extinction?

Sadly, the UN Decade on Biodiversity (2011-2020) achieved very little, with rampant biodiversity loss continuing and all international targets missed. But 2021 could be a game changer, with a host of events like the UN Biodiversity Conference (COP15) serving as key opportunities to help reshape our future response.

Young people, and the future generations they represent, have the most to lose from this ongoing mass destruction. The online 2021 Summit offers an exciting range of discussions & workshops, designed to help inform and empower students, teachers and schools on a shared journey to create a more sustainable world.

This year's emphasis will be on strengthening youth collaboration to protect nature, linked to wider international processes and initiatives.

Linked to key international dialogue on protecting biological diversity

Global online forum for students aged 7 upwards

Developing children's capability, capacity and confidence, teachers' knowledge and skills, and school capacity

**5-10 JULY - ALL ONLINE
REGISTRATION IS
OPEN NOW!**
